1. Introduction

It is your automation enabler for a simplified digital transformation journey, business agility, high throughput, and higher ROI. Automationwhiz has a wide range of bots capable of automating critical business processes spanning across diverse industries and domains.

Automationwhiz emphasis on process automation and lets businesses optimize their processes without complexity and with maximum return on investment. It provides end to end support for process automation starting from BOT creation, orchestration to execution.

2. New Features

2.1 Sample Bot in Bot Designer.

This feature allows user to view list of sample bots, tutorial video for running the bot, inputs, output path. User can also view steps of the bot and run the bot.

Bot List

Bot Name	Version	Environment	Description	Category	Created Date	Created By	Actions
OCR_Glib_Bot_Manthan	0.0.1	DEV	OCR_Glib_Bot	Sales	Jul 27, 2023, 6:41:35 PM	awqatestuser1	
Test_Bot_6694827848	0.0.2	PROD	Updated Test Description	Sales	Jul 20, 2023, 5:29:16 AM	anonymousUser

OCR_Glib_Bot_9327679040	0.0.1	DEV	OCR_Glib_Bot_9327679040	Sales	Jul 18, 2023, 6:21:48 PM	awqatestuser1	
OCR_Glib_Bot	0.0.1	DEV	OCR_Glib_Bot	Sales	Jul 18, 2023, 6:17:10 PM	awqatestuser1	

- By clicking on "Sample Bots", sample bot page will open, user can view list of sample bots and its features.

The screenshot shows a 'Bot List' interface with a search bar, a 'Sample Bots' button, and a table of bots. The table has columns for Bot Name, Description, Video, and Actions (Inputs, Output path, Run, Steps). The bots listed are ExcelToWeb, WebToExcel, Excel To Invoicely Account, MIS, and BOE.

Bot Name	Description	Video	Actions			
			Inputs	Output path	Run	Steps
ExcelToWeb	This bot is used to fill out the web for...	ExcelToWeb.mp4	N/A			
WebToExcel	This bot is designed to extract the na...	WebToExcel.mp4				
Excel To Invoicely Account	This automation bot is designed to e...	ExcelToInvoicelyAccount.mp4				
MIS	This Bot is used to generate eight diff...	MIS.mp4				
BOE	This Bot is used for extracting 200+ d...	BOE.mp4				

- Bot Name
 - By clicking on the name of bot, zip file will be downloaded with the required files for the bot.
- Description
 - It shows description added for the bot.
- Video
 - Here users can download sample video by clicking on video icon. User can also play the video by clicking on play icon.
- Input
 - By clicking on "Download Inputs" icon, input file of the bot will be downloaded.
- Output Path
 - From here user can copy output path of the bot.
- Run
 - This feature allows the user to run the sample bot.
- Steps
 - By clicking on "View" icon, bot editor will open, here user can view all the commands and its details added in the bot.

2.2 Cygnnet OCR Multiple Command Implementation-Glib API integration.

Cygnnet OCR action command allows user to create a bot for glib integration. Based on this command, glib file processing will execute the file for image processing.

Command Repository

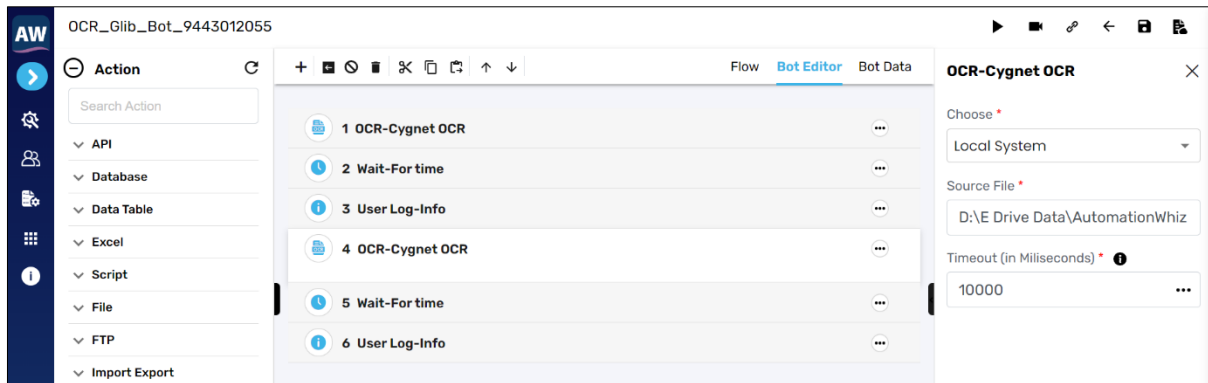

Command repository defines list of ready to execute commands for the users available in the Bot Designer (create bot feature). User will be able to use these handy commands (which are already scripted) and just enter the values they wish and execute as per their required. Commands will be found in the "Action" option from the side bar panel. Below will be listed all the commands available in the portal for users to use.

Image Processing

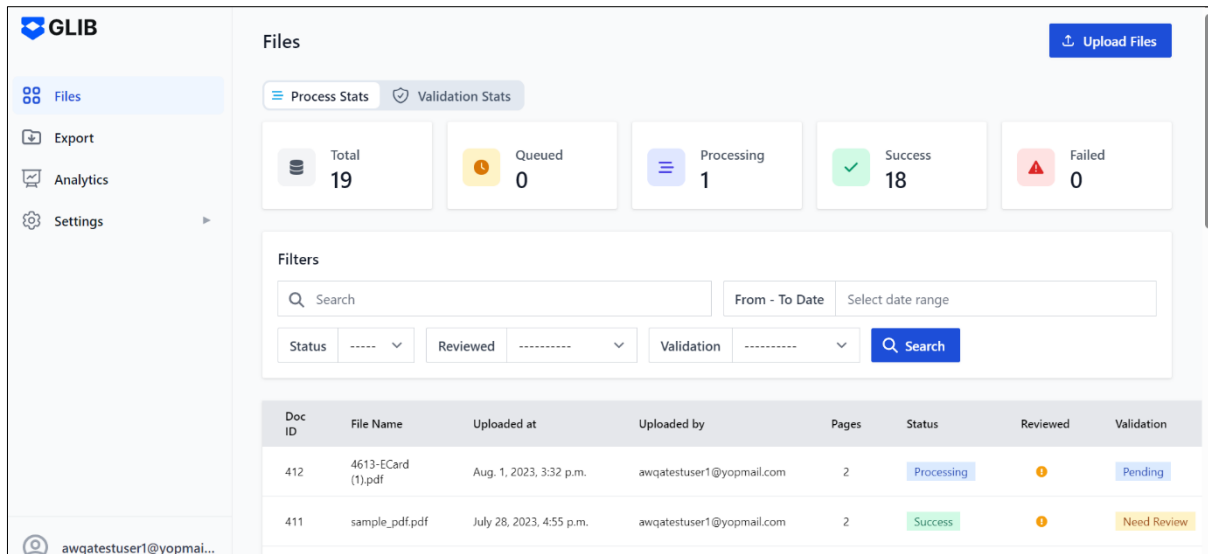

OCR

Cygnnet OCR

This feature allows the user to add multiple Cygnnet OCR commands for Glib integration.

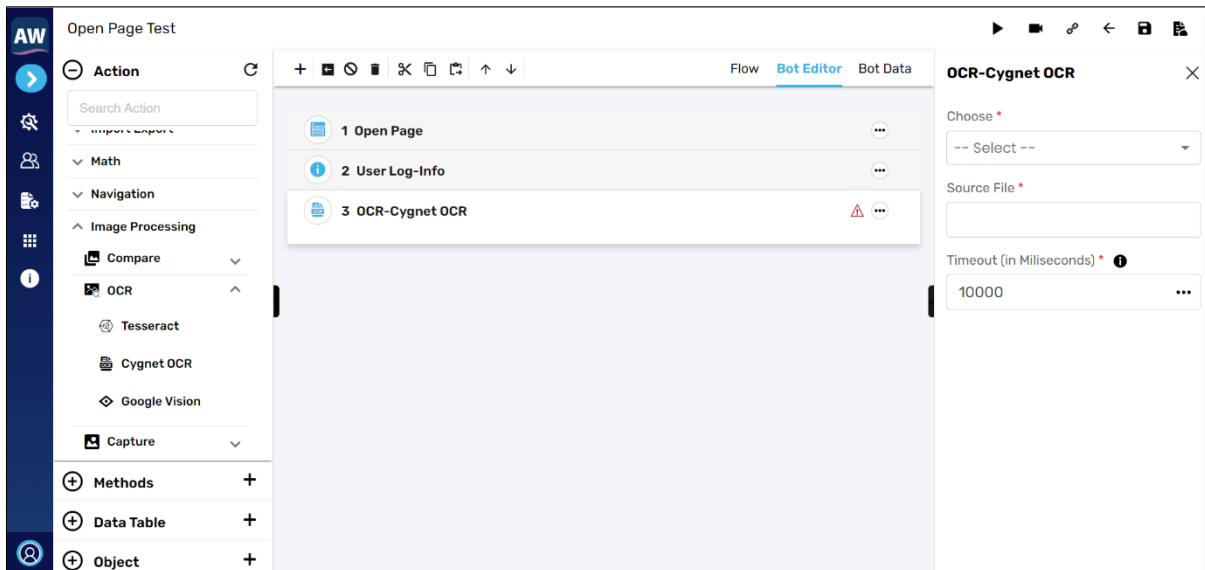

- Bot will be executed on the Glib platform.

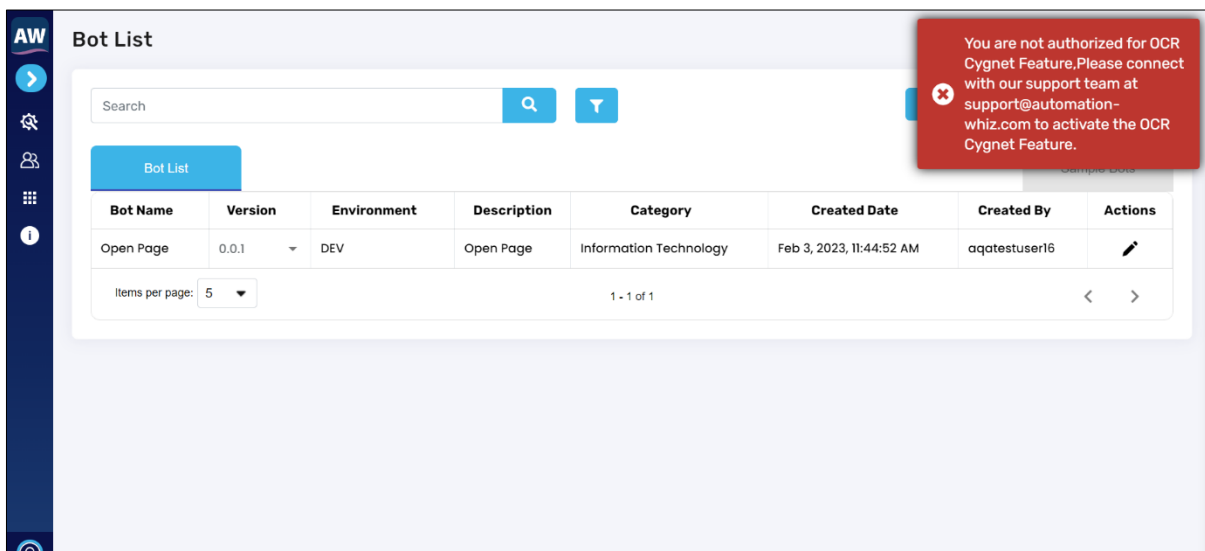

- Users will be able to view job status in Bot Manager – Job Management.

Community users with subscription plan will be able to use Cygnnet OCR command for the bot creation or edit.

Community users using trial version of the product will not be able to use Cygnnet OCR command, and toast message will display if user tries to add command in the bot.

2.4 Delete Column/Row Command.

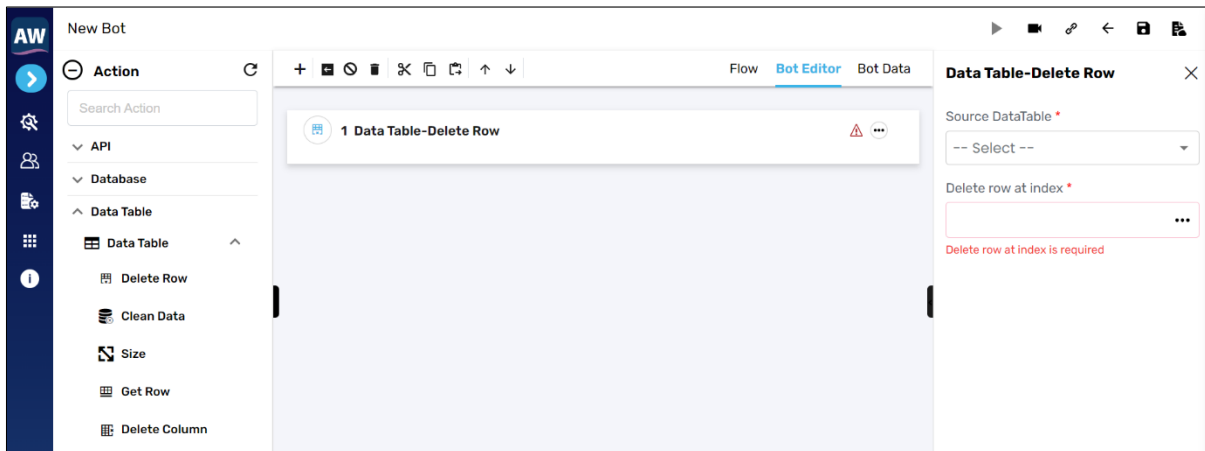

Data Table

Use Data Table to add/import multiple data sets and input values for executing Test Case(s).

Data Table

Delete Row

This Action allows users to delete the entire data of a row at the index.

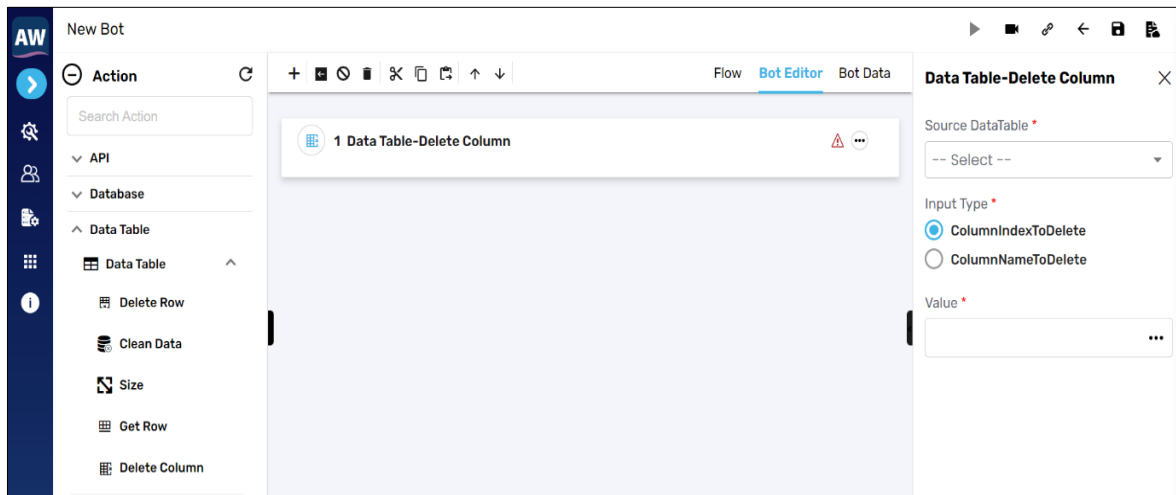

Fields:

- Source Data Table
 - Select the data table for which user wants to select the rows of
- Delete row at index.
 - This will allow user to provide index number for the row which needs to be deleted.
 - User can enter 0, which will be considered as first row of the table.

Delete Column

This action allows users to delete the entire data of the column.

Fields:

- Source Data Table
 - Select the data table for which user wants to delete the column of.
- Input type

- Here user can select input type from radio buttons for which value will be considered to delete.
- Value
 - User will be able to enter value for the input type selected.
 - Column Index
 - This will allow user to provide index number of the column to be deleted.
 - User can enter 0, which will be considered as first column of the table.
 - Column Name
 - This will allow user to enter the name of the column to be deleted.
 - User can enter alpha numeric, and special characters as value.
